CARLOS ANDRÉS CÁCERES CAMPO FULLSTACK DEVELOPER

ABOUT ME

Graduated in Systems Engineering from Universidad del Valle, with over two years of experience in Full-Stack application development and application support. I focus on building efficient, results-driven technological solutions by applying best practices and analytical thinking. I have experience in API integration and incident resolution, and I have worked with technologies such as .NET, JavaScript, PHP, TypeScript, Java, and Angular. I enjoy working in teams, staying up to date with new technologies, and contributing to projects where I can deliver real value.

WORK EXPERIENCE

Software Developer – Dev.pro , Las Vegas, EEUU – 2024 – (Current position)

- Develop and maintain integrations with APIs and third-party services using Node.js, PHP, .NET, Java, and databases such as MongoDB and Oracle.
- Implement cloud-based solutions using Azure and AWS.
- Resolve support tickets by analyzing incidents and proposing solutions to ensure system continuity.

Achievements : I optimized the performance of several endpoints, reducing their response times from 5 seconds to between 500 ms and 1 second by reorganizing database structures and parallelizing processes.

IT Intern – Copsevir LTDA , Cali, Colombia – 2023 – 2024

- As an IT intern, I contributed to the development and improvement of modules with PHP, Javascript, jQuery, and Bootstrap.
- Managed MySQL databases and Linux servers.
- Resolve support tickets from users.

Achievements : I contributed to the development of new features for the point-of-sale system and participated in creating a daily automated process to generate and send reports to an external service, optimizing the information flow.

Website Administrator – Universidad del valle, Cali, Colombia – 2019 – 2023

- Administered and maintained websites using HTML5, CSS, and JavaScript, ensuring a seamless user experience and optimal performance.
- Managed content and configurations on Joomla-based websites, enhancing site functionality and user engagement.
- Conducted regular updates and troubleshooting to maintain website security and performance, addressing issues promptly to minimize downtime.

Achievements : I proposed and developed new responsive designs for several web pages of the Electronics Engineering, Electrical Engineering, and Technology programs, working closely with the communications team to ensure proper integration into the institutional website.

Freelancer – Web Developer – Mr.Locksmith, Utah, EEUU – 2022

- Led the design, development, and deployment of a responsive website that reflected the customers standards of Mr.Locksmith.
- I Utilized React to create a dynamic user interface and enhance the user experience.

Achievements : As a result of my contribution, the new website helped Mr.locksmith strengthen its online presence and achieve an increase in traffic, improved lead generation, etc.

EDUCATION

Universidad del Valle – Software engineering

SENA – Software Development Technician, Cali

SKILLS

Programming languages

- JavaScript
- TypeScript
- Java
- C#
- Python
- Php

Frameworks

- NextJs
- .NET
- Angular
- NestJS
- Spring Boot
- Express

DB

- PostgresSQL
- MySQL
- MongoDB
- FireStore

Others

- Figma
- GIT
- Docker
- JQuery
- React
- Tailwind
- MUI

Languages

- English: Advanced (C2).
from EF SET certificate – link
- Spanish: Native
